Key Messages

- **Vaccines are our best shot at beating COVID-19!** All approved vaccines were authorized by Health Canada after many tests to make sure they are safe and effective. For more information, visit halton.ca/COVIDvaccines.

- **Don't delay, get your COVID-19 vaccine!** Make sure to get both doses to protect yourself, your family and our community from the virus. For more information, visit: halton.ca/COVIDvaccines.

- **Haven't received your COVID-19 vaccination yet?** You can book an appointment at any one of Halton's vaccination clinics. The vaccines are authorized by Health Canada and were tested for safety and effectiveness on thousands of people. Visit halton.ca/COVIDvaccines for more information and to book your appointment.

- **Worried about COVID-19 vaccine side effects?** Mild symptoms are common after you get the COVID-19 vaccine. Pain at the injection site, muscle soreness or headache are normal signs that the vaccine is working. Serious side effects are very rare - vaccines are safe and the best way to protect yourself from the virus. For more information, visit: halton.ca/COVIDvaccines.

- **COVID-19 vaccines are safe; all safety procedures were followed!** The vaccines were made and approved quickly because of technology, funding and scientists, governments and industry working together. Health Canada has approved the COVID-19 vaccines because they are safe and effective. For more information, visit: halton.ca/COVIDvaccines.

- **COVID-19 vaccines and pregnancy concerns? Pregnant and breastfeeding individuals should be vaccinated!** Pregnancy may increase your risk of serious illness from COVID-19. COVID-19 Vaccines have not been linked to infertility or miscarriage, and may protect breastfeeding babies. Speak to your doctor to learn more. For more information, visit: halton.ca/COVIDvaccines.
